## Disinfecting Solutions

To help curb  
the spread of the  
**COVID-19**  
**Coronavirus**  
and Other  
Viruses & Bacteria

## Welcome to Holden Disinfecting Solutions

Holden Disinfecting Solutions provides Commercial Disinfection Services to help curb the spread of COVID-19 caused by the novel coronavirus, and other widely spread viruses.

Since the coronavirus outbreak, our highly skilled teams of specialists have disinfected over 50 million sq. ft. of various style buildings and 2,000 essential vehicles across the United States. Our clients include industrial warehouses, office buildings, state counties, municipalities, schools, correctional facilities, prisons, military bases, emergency response centers, courthouses, universities, gyms, sports complexes, manufacturing plants, police and fire stations. We've also partnered with some of the largest retailers in the nation, providing them with our multi-level disinfection solutions to help keep their distribution centers and stores safe and open for business.

## Why Companies Choose Holden Disinfecting Solutions

**State-of-the-Art Equipment** – Our technicians are equipped with the latest high-tech electrostatic and atomizer sprayers.

**Disinfectants** – We only use disinfectant products that are qualified for the use against SARS-CoV-2, the novel coronavirus that's known to cause COVID-19.

**Expert Staff** – Our services are performed by highly skilled trained technicians. We oversee the entire disinfection process so you can have a peace of mind that your job is done according to our strictest guidelines.

**Competitive Rates** – Unlike much of our competition, we haven't increased our rates in order to take advantage of these tough times. Our pricing has remained reasonable throughout the entire pandemic and will continue to be reasonable.

**Emergency Service** – Our expert disinfecting teams are available for immediate service 24 hours a day, 7 days per week.

## FAQ

### **Why is Holden Disinfecting Solutions different than using a janitorial service?**

Holden Disinfecting Solutions provides Disinfection Services, and we use "Hospital Grade" Disinfectants. The US EPA Performance Standard for Disinfection requires a significantly higher level of reduction: 99.999% reduction/kill (6-log reduction). US EPA registered Disinfectants are identified as a higher level of pathogen reduction.

### **What is the difference between cleaning, sanitizing, and disinfecting?**

Cleaning is done with water, a cleaning product, and scrubbing. Cleaning does not kill bacteria, viruses or fungi ("germs"). Cleaning products are used to remove germs, dirt, and other organic material by washing them down the drain. Sanitizing and Disinfecting products are chemicals that work by killing germs. Disinfectants kill more germs than sanitizers. In most cases, a cleaning product is used first, then followed by either sanitizing or disinfection of the surface when necessary.

### **We are currently using Lysol, bleach and other cleaners. Are we doing an adequate job?**

Those products are considered cleaners and sanitizers. Bleach is both a disinfectant and sanitizer and has several limitations, including that it cannot be used on electronics and has affixation, stain and discoloration issues which limits wide-scale use. Holden Disinfecting Solutions is a professional commercial grade service utilizing High-Level Disinfectants, approved by the CDC, for disinfection that kills SARS-CoV-2 (the coronavirus that causes COVID-19) on surfaces.

### **How do we prepare for Disinfection and what steps should be taken after Disinfection?**

Holden will provide a Pre-Treatment Checklist to assist customers in preparation for disinfection. After disinfection, please follow our Post-Treatment Care Guide which goes into detail on the proper way to maintain the disinfectant, including recommendations to extend the disinfectant's effectiveness and ultimately the protection of your facilities.

### **Does Holden Disinfecting Solutions disinfect phones, electronics and computers?**

Yes! We disinfect electronic, computer and phone equipment as part of our service. The electrostatic and atomizers sprayers' mist does not harm electronic, computer and phone equipment.

## Duct Cleaning & Disinfection

### **Holden Disinfecting Solutions provides Commercial Air Duct Disinfection Services for your building's HVAC system.**

Indoor air pollution is now listed by the Environmental Protection Agency as the fourth greatest environmental threat to Americans. When your heating and cooling system is running, airborne contaminants are being drawn into your duct system. Over a period of time, these harmful contaminants will eventually build up inside your air ducts. By having our experts provide duct cleaning and disinfection, you can turn your facility into a clean breathing haven. It will also help reduce your heating and cooling costs and can even extend the life of your heating and cooling equipment.

### **Professional-Grade Disinfecting**

Our Air Duct Disinfectant is an EPA (Environmental Protection Agency) registered hospital-grade disinfecting and sanitizing product called Bioesque. This product is able to kill germs, bacteria, viruses (including COVID-19), Pseudomonas, Staphylococcus aureus, Influenza A / Brazil, 2009 H1N1 flu virus, Trichophyton, HIV-1, Hepatitis B and Hepatitis C.

### **Safe and Clean Air Ducts Longer**

After our trained specialist applies the disinfectant, your facility's air ducts have lasting protection against germs, fungi, mold, mildew and viruses. It is also able to prevent the spread of infection in your air duct system, while maintaining a clean, safe and healthy facility.

## Industries We Serve

---

Government & Municipal  
Hotels  
Sports Complexes  
Correctional Facilities  
Banks  
Healthcare Facilities  
Schools and Universities
